EDUCATION

Astana IT University
3rd year of Bachelor
Software Engineering

Astana, Kazakhstan
Sep. 2023 — Jul. 2026

- **GPA:** 3.3 / 4.0
- **Relevant coursework:** Web Technologies, Game Development, Mobile Development, Advanced Operating Systems, Computer Networks, Database Management Systems

TECHNICAL SKILLS

Programming Languages: Python, Java, Swift, C#, Kotlin, SQL, HTML/CSS/JavaScript/TypeScript
Technologies & Frameworks: Flask, Bootstrap, Node.js, SwiftUI, Flutter, Unity, React, Redux

PROJECTS

Vehicle Inspection Hub | Node.js, Express, Spring Boot, Java, MongoDB, React Native

- Designed and developed the authentication service using Node.js/Express, implementing secure user registration, login, and session management.
- Built the mobile application in React Native, developing key user-facing screens and ensuring smooth communication with backend microservices.
- Implemented frontend UI components and navigation flows to deliver an intuitive inspection workflow experience.
- Integrated Kafka for event-driven microservice communication and used Redis caching with LWW conflict resolution to ensure consistency and performance.

Bullet Fate | Unity, C#, Wwise

- Designed and implemented core gameplay mechanics and progression systems, contributing to overall game feel and player experience.
- Created visual assets including sprites, environment tiles, and UI elements, and composed original audio to shape the game's atmosphere.
- Contributed across design, engineering, and art disciplines, covering multiple stages of the production pipeline.

EXPERIENCE

Game Developer Intern

Astana Hub GameDev Center

Jun. 2025 — Jul. 2025,
Mar. 2026 — May 2026

As a Game Designer and Engineer Intern, I held a key hybrid role across two projects. On the 2D platformer "I Wanna Be The Boss," I programmed the core gameplay prototype and main menu system in Unity/C#, contributed to game and level design, and led project coordination by organizing weekly team meetings and tracking milestones. On Bullet Fate, I contributed as a game designer, engineer, artist, and sound designer — handling mechanics implementation in Unity/C#, visual asset creation, and original audio composition alongside the team.
